Conversion Kits

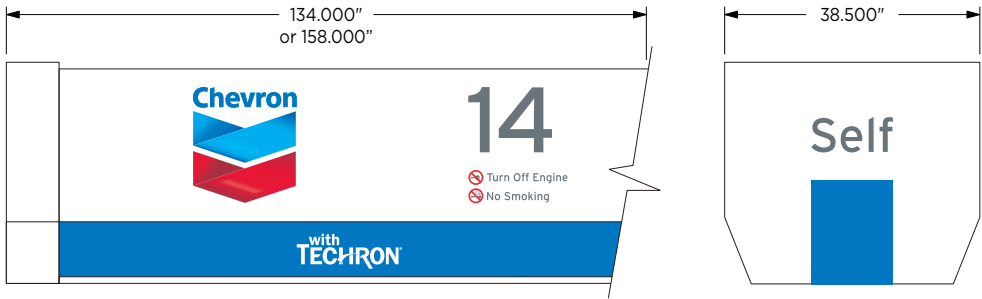

G5 Conversion Kit
Includes variation of adapted G5 which takes an existing G5 spanner and replaces the polycarbonate mode cap face and side face to create a similar look to a G6 Wide Spanner.

* The G5 spanner must be centered on dispenser, after installing faces and mode sign.

G2/G4 Conversion Kit
Includes variation of adapted G2/G4 which takes an existing G2/G4 spanner and replaces the polycarbonate mode cap face and side face to create a similar look to a G6 Spanner.

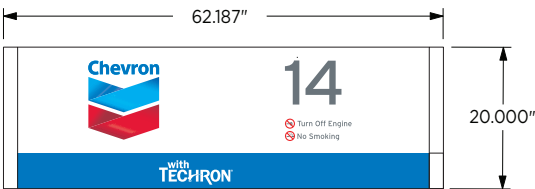

* See Spanner Identification Guide for determining if current spanner is a G2/G4 model.

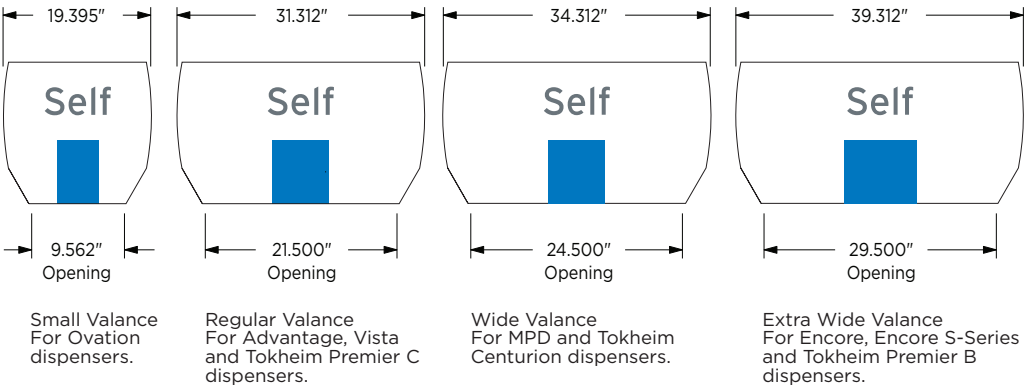

Spanners | Valances

Valances

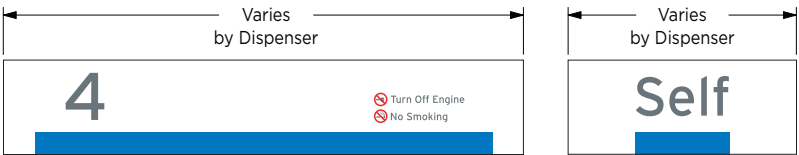

Proprietary Valances
All valances share a common length and height. The width of each valance varies to accommodate each dispenser model. Florida high-wind versions available, see order form.
