

## > SPANNER IDENTIFICATION GUIDE FOR THE G4 RETROFIT KIT

G2/G4 Starting Gate (13'2")

G2/G4 Cantilever (11'2")

**The best way to identify an illuminated G2 or G4 Cantilever or Starting Gate Chevron Spanner is the face material. Spanner type must be identified before ordering a Retrofit Kit. Please reference the photos below for comparison of face materials.**

Level 2 / HID

- > Profile sheet material.  
2 pieces of clear plastic  
with visible horizontal lines... creates visible flutes
- > Not smooth to the touch.
- > Has applied white vinyl to front of the face.
- > Please Contact LSI to order G6 spanners.  
The G4 Retrofit Kit will not fit these series  
or models of spanners.

G2/G4

- > Pigmented white polycarbonate  
material. The plastic material is one piece of  
plastic pure white throughout its thickness.
- > Smooth to the touch.
- > No white vinyl applied to front of the face.
- > Please Contact LSI to order the correct  
length Retrofit Kit.  
Available in 13'2" starting gate and  
11'2" cantilever kits.
