

Dispenser Fuel Nozzle Label Decal Placement Guide

- Please post fuel nozzle label decals immediately after receiving them.
- Post ONE decal above each fueling nozzle. If possible, place each decal closest to the nozzle, as illustrated in the below diagram. Do not place decal over any loyalty or regulatory decals.

Cleaning Dispenser Surface:

Please clean the dispenser surface before applying the decal with a cleaner such as 409, Fantastik, or mild detergent/soap. Be sure to rinse the cleaner off with water and then pat the surface dry thoroughly before applying the decal.

Adhering Decal:

After cleaning and drying the dispenser surface, peel back the paper liner on the back of the decal to expose the adhesive completely. Position the decal as illustrated and apply pressure to adhere to dispenser.
